051805Physical
Characteristics...

Hi Laura,

We have reviewed the responses to comments on the Site Characteristics report and concur with the responses with a minor exception to the General comment. That comment requests information to be provided in the document regarding final site configuration, including functional channels. Currently, no discussion of site configuration is planned. As discussed with you and Karen Wiemelt, EPA believes that final site configuration is an integral related component to the site remedies. We have proposed that a brief discussion of the site configuration objectives and figures would be sufficient to cover this issue. Please call me at 303-312-6659, if you have further questions.

Thanks,
Larry

FW: Draft response to comments on
the Physical Characteristics SR

Hi Larry,
I have sent this to the RFCA PCs, but since Mark is out most of this week (and you helped review the document and sent me EPA's comments), I thought I would forward this to you. Thanks, LMB

Attached is the Draft Response to Comments on the Physical
Characteristics Summary Report. Please review and let us know if you
have any comments. Once the response to comments are approved, I will
incorporate the changes, turn the summary report into RI, Section 2,
Physical Characteristics of the Study Area, and place section 2 on the
DOE website. LMB
